

SUPER FX adapter

This adapter is designed to make creating replos of games like Star Fox 2 a cinch! No more manual wiring.

NOTE: This adapter may not fit in an original Star Fox donor board, due to different chip placement.

Assembly is simple:

- 1) Remove the existing Maskrom from the donor cart. (Stunt Race FX shown below)

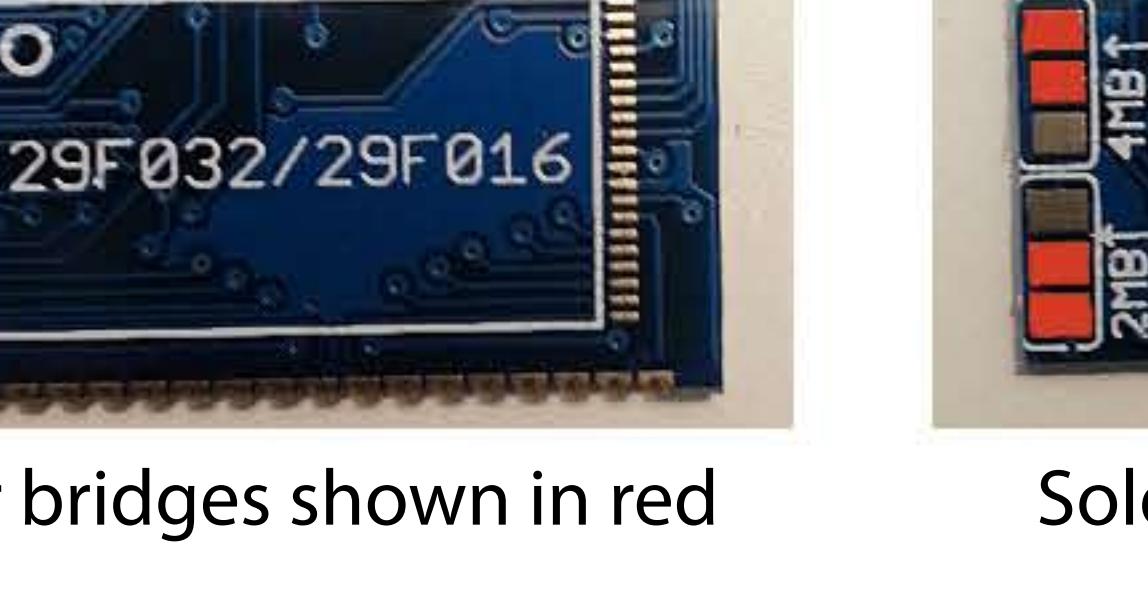

- 2) Clean up the contacts, and remove any residue.

3) Place your adapter board over the contacts. Make sure they are properly aligned, otherwise your game may not work. Solder the adapter into place as shown (prototype shown, actual color may vary).

- 4) Program a 29F032 or 29F016 chip with your ROM. Place onto the adapter board as shown and solder into place.

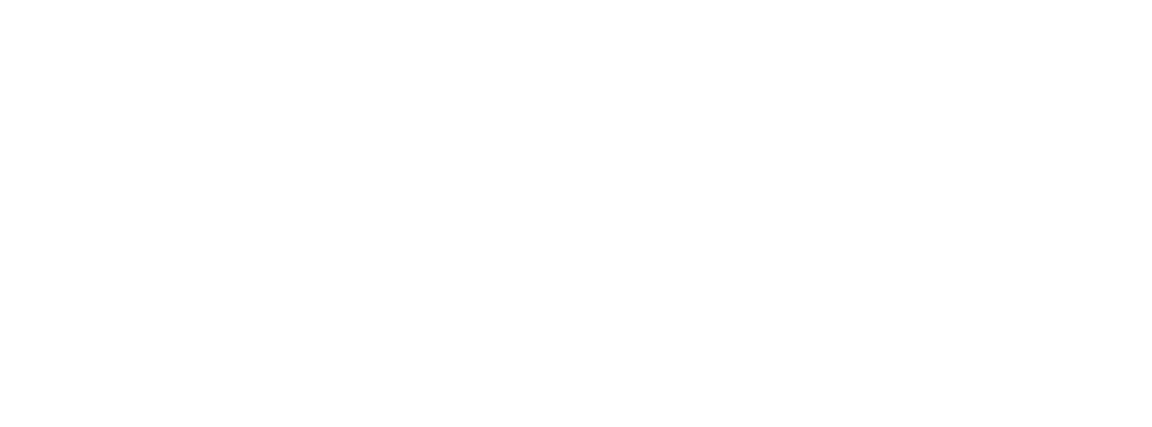

FOR 1MB or when using a
donor PCB with a 32 pin rom

multicarts not covered here, and require a switch. You'll need to run wires from the middle pad of each jumper to a switch (reset switch, or manually) to change between games.

- 6) Test your game, and you're done!
